

## Installing the Screen Protector

The enclosed screen protector is designed to help prevent scratches and dust from marking up your touch screen indicator. Please follow these instructions to install it.

1. Using a micro fiber cleaning cloth or lint free cloth, wipe dust and fingerprints off the screen.
2. Starting from one of the corners, carefully and completely remove the glossy backing from the screen protector. Do not touch the sticky side of the film. Doing so will leave fingerprints.
3. Line up the screen protector with the screen.
4. Gently lay the screen protector on the screen with the sticky side down.
5. Using your finger or a smooth piece of hard plastic (such as a driver's license or credit card), smooth out any wrinkles or bubbles in the screen protector from the middle towards the edges.
6. If you do not achieve the desired results, gently remove the screen protector from the touch screen and repeat steps 3 through 5.
