

Maximize truck scale surface durability

Weigh-Tronix — the only truck scales with a galvanizing option

Weigh-Tronix steel deck truck scales with the option to galvanize are available in two styles –

- BridgeMont BMS
- SteelBridge IMXT

Weigh-Tronix offers the only truck scales with an option to galvanized as a completed unit. Scale modules are hot-dip zinc galvanized to ASTM 123 Standards. The galvanizing process allows the zinc coating to the steel truck scale structure. Each module is galvanized on all inside and outside surfaces. Life expectancy of the galvanized surface is 30-50 years.
